# **ENVIRONMENTAL HEALTH**

## **ON-SITE WATER PROTECTION**

# MISSION

THE MISSION OF THE RANDOLPH COUNTY ENVIRONMENTAL HEALTH SECTION IS TO SAFEGUARD LIFE, PROMOTE HUMAN HEALTH AND PROTECT THE ENVIRONMENT THROUGH THE PRACTICE OF MODERN ENVIRONMENTAL HEALTH SCIENCE, THE USE OF TECHNOLOGY, RULES, PUBLIC EDUCATION AND ABOVE ALL, DEDICATION TO THE PUBLIC TRUST

# SERVICES

## ON-SITE WATER PROTECTION

On-Site Water Protection is responsible for providing regulatory oversight of sub-surface on-site wastewater treatment and dispersal systems, as well as inspection and testing of private drinking water wells constructed, repaired or abandoned, on or after July 1, 2008. This program is a joint effort among the local health departments and the On-Site Water Protection Branch. To carry out this mission, the Branch provides statewide regulatory and consultative services related to both the wastewater and private drinking water wells to local health departments and numerous other clients, including builders, developers, land owners, system installers, well drillers, system operators, engineers, soil scientists, geologists, environmental health consultants and others.

## PUBLIC SWIMMING POOLS

The Environmental Health Public Swimming Pools Program regulates the construction and operation of pools used by multiple families for swimming, bathing, or recreation.

## TATTOO PARLORS

The Tattoo Program assures the safety of tattooing by establishing sanitation and infection control procedures. Tattoo artists and permanent color technologists must follow to maintain a Tattooing Permit issued by the Department through local health departments.

## CHILDHOOD LEAD POISONING PREVENTION

The North Carolina Childhood Lead Poisoning Prevention Program (CLPPP) currently coordinates clinical and environmental services aimed at eliminating childhood lead poisoning. NC CLPPP also provides technical assistance, training and oversight for local environmental health specialists, public health nurses, laboratory technicians and private medical providers to assure healthy and safe conditions. Among the program's other activities are: early identification, surveillance, abatement enforcement, monitoring inspections and risk assessments.
